
Session Title: Polymers and Hybrid Materials for Plastic Electronics and Photonics X
Date & Time: **November 3, 2016 (Thur) / 13:30~15:30**
Room: **A (Room 101)**

Session Chair: Przemyslaw Data (Silesian University of Technology, Poland)

3A2-1

13:30~13:55

[Invited] Development of Novel π -Conjugated Systems for Electronic Application: Chemical Structures-Properties-Function Relationship

Yutaka Ie and Yoshio Aso
ISIR, Japan

3A2-2

13:55~14:20

[Invited] Eutectic Crystallization of Organic Semiconductors

Youngjong Kang
Hanyang University, Korea

Session Chair: Cheolmin Park (Yonsei University, Korea)

3A2-3

14:20~14:45

[Invited] Electro-Optic Polymer Modulator toward Silicon Photonics Integration

Shiyoshi Yokoyama
Kyushu University, Japan

3A2-4

14:45~15:00

Dual-Functional Organic Photoactive Conducting Modulator for Simple Circuits

Seung-Chul Lee, Suck-Hyun Lee, and O-Pil Kwon
Ajou University, Korea

3A2-5

15:00~15:25

[Invited]Electromagnetically Induced Transparency of a Plasmonic Metamaterial Light Absorber Based on Multilayered Metallic Nanoparticle Sheets

Kaoru Tamada, Shihomi Masuda, Ryo Degawa, Daisuke Tanaka, and Koichi Okamoto
Kyushu University, Japan
